MEMORANDUM FOR THE RECORD

SUBJECT: PAR-237, Briefing Aids

1. This PAR is for the design, preparation and supply of 38 briefing boards and one color transparency of each board for teleprompter slides covering eleven separate PAR's under contract [REDACTED]

25X

2. In other research and development contracts, briefing aids on the work under contract are generally furnished gratis and do not appear as a direct charge on the contract.

X1 3. In the case of [REDACTED] I was informed that the cost of the briefing boards was being charged to each PAR and that the charges were not identifiable; therefore, I requested that a PAR be prepared to cover all briefing boards to provide a record of the activity and to identify the costs involved.

X1 4. The estimated cost of these briefing boards, including teleprompter slides, is about [REDACTED] this is believed to be rather expensive. However, since [REDACTED] was, by implication, authorized some twelve months ago to proceed with this effort, and since they have already expended at least [REDACTED] it would not be economically feasible to terminate this effort. It is therefore recommended to be in the best interest of the Government to complete this task.

PAR-213 Briefing Charts

Dear Rock,

The eight (8) briefing charts enclosed have been approved with the changes appearing thereon. The chart showing a stereoscope with Polarizing eyepieces, (formerly chart number 8), will not be used and is therefore deleted.

For effective use of these briefing boards, examples of the film results obtained by the methods depicted on the charts are required. These should be provided in the form of 3 1/2" x 4" teleprompter slides.

It is requested that the following examples be furnished if feasible:

a. Three (3) copies each of SO-121 printed on SO-121 by the subtractive process. (1) Also, three (3) copies each of SO-121 printed on SO-121 by the additive process. These are to support charts 2 and 4. (1 2 1 0 X)
(3 1 2)

b. One (1) each black-and-white positive type 8430 from original negative type 4404. One (1) each color dupe, type SO-121, printed from SO-121. These are to support chart no. 3.

c. One (1) each 5x - 10x and 20x Ektacolor Prints from SO-121 printed through 5x interneg Ektacolor film. These are to support chart no. 5.

d. Four (4) each 5x color prints on type 6109 film; prints to be made as outlined in chart no. 6. These prints are to support that chart.

e. One (1) each duplicate positives made on film types 8430 and SO-121 by the color separation technique outlined in chart no. 7; also, for comparison purposes, we require one (1) each dupe positives of the same, printed using white light. These are to support chart no. 7.

5 May 1965

It would also be most helpful if examples of the original color reversals could be furnished for each of the above requested slides to provide a means for comparison.

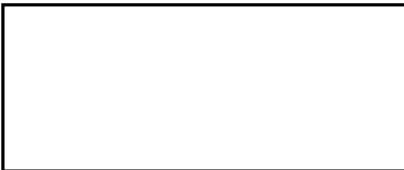

Sincerely,

Wil

PAR-214 Briefing Charts

Dear Rock,

The three (3) briefing charts enclosed have been approved with the changes appearing thereon. The new title is in accordance with the approved condensed titles.

Sincerely,

Will
